PROFESSIONAL SUMMARY

Python Developer and B.Tech graduate in Artificial Intelligence & Data Science with project experience building Python-based analytics and machine-learning solutions. Skilled in Python, SQL, PostgreSQL, MySQL, and data processing with Pandas and NumPy. Built a Customer Decision Intelligence Platform featuring customer segmentation, churn prediction, customer lifetime value analysis, cohort analysis, revenue forecasting, and explainable AI, along with AURA, a reliability automation project. Seeking an entry-level Software Developer / Software Engineer role.

TECHNICAL SKILLS

Programming: Python, SQL
Databases: PostgreSQL, MySQL
Libraries: Pandas, NumPy
Machine Learning: XGBoost, churn prediction, SHAP explainability
Analytics & BI: Data cleaning, exploratory data analysis (EDA), KPI analysis, Power BI, Tableau
Domain Skills: Customer analytics, cohort analysis, forecasting and reliability monitoring

PROJECTS

AURA — Autonomous Unified Reliability Agent

- Built a closed-loop reliability system designed to automate the incident lifecycle: observe, detect, diagnose, remediate, and verify.
- Designed a deterministic root-cause analysis engine with runbook-based remediation, telemetry verification, and escalation for unresolved failures.
- Created a real-time telemetry dashboard for system resilience testing.

Customer Decision Intelligence Platform

- Developed an end-to-end customer analytics platform covering RFM segmentation, churn prediction, customer lifetime value (CLV), cohort analysis, and revenue forecasting.
- Built an XGBoost churn model with SHAP explainability to surface customer-level churn drivers and risk factors.
- Designed Power BI dashboards for customer KPIs, customer segments, churn risk, revenue trends, and business insights.

EDUCATION

B.Tech in Artificial Intelligence & Data Science, Kamaraj College of Engineering & Technology.
CGPA: 7.72 | **Graduated:** 2025

CERTIFICATIONS

- **Introduction to Model Context Protocol -** Anthropic
- **Google Analytics Individual Qualification -** Google
- **Data Fundamentals -** IBM
